POINTS TABLE - END OF MATCH 6

Semi Final

In the event of teams finishing on equal points, the right to play in the semi-final will be determined as follows:

- The team with the most point

-If equal, the team with the most number of wins

- If still equal, the team with the highest Net Run Rate

-It still equal, the team that won the round robin match over the other team or teams where applicable, who are equal on points, have the same number of wins and run rate.

In a match declared as a No Result, run rate is not applicable.

Final

In the Event of either semi-final being abandoned or ending in a no result the right to play in the final shall be awarded to the team that finished higher in the group stage of the event.

Net Run Rate

A team's net run rate is calculated by deducting from the average runs per over scored by that team throughout the competition, the average runs per over scored against that team throughout the competition.

In the event of a team being all out in less than its full quota of overs, the calculation of its net run rate shall be based on the full quota of overs to which it would have been entitled and not on the number of overs in which the team was dismissed. Only those matches where results are achieved will count for the purpose of net run rate calculations. Where a match is abandoned, but a result is achieved under Duckworth/Lewis/Stern (3), for net run rate purposes Team 1 will be credited with Team 2's Par Score on abandonment off the same number of overs faced by Team 2. Where a match is concluded with Duckworth/Lewis/Stern (3) having been applied at an earlier point in the match, Team 1 will be credited with 1 run less than the final Target Score for Team 2 off the total number of overs allocated to Team 2 to reach the target.
